DETAILED ACTION

Election/Restrictions

1. Applicant failed to elect a species of invention for examination on the meritsj as required in the office action mailed 10 September 2007. Examiner is repeating the requirement herein along with a second restriction between related elements. Applicant **must** elect a single species for examination on the merits in reply to this office action.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-48, 61-66, and 69, drawn to a system and kit for fluid processing, classified in class 604, subclass 416
 - II. Claims 49-60, drawn to an apparatus for piercing a container, classified in class 604, subclass 411.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are directed to related products. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have a materially different design, since the invention in Group II does not comprise any pumping apparatus as set forth in Group I. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species:

- a. FIGS 1A-1B, 2A-2B
- b. FIG 1C
- c. FIGS 3A-3I, 6, 2A-2B
- d. FIGS 4, 5A-5C, 7A-7D, 8A-8C, 9A-9F, 10, 11, 12A-12B

The species are independent or distinct because claims to the difference species recite the mutually exclusive characteristics of each species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are held by the Examiner to be generic.

Applicant is advised that a reply to this requirement **must include an identification of the species that is elected consonant with this requirement**, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

6. Applicant is advised that the reply to this requirement to be complete **must** include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
